

Ref. No. - IPCA/EHS/2019/ 125  
Date: 10/11/2019

To,  
**The Joint Director**  
Regional Office, Western Region  
Ministry of Environment & Forests, Govt. of India  
Kendriya Paryavaran Bhavan,  
Link Road No. 3, Ravi Shankar Nagar  
Bhopal-462016

**Sub** : Six Monthly Compliance of EC Conditions.

**Ref.** : MoEF file No. J-11011/169/2011-JA II(I) dated 22.06.2015

Dear Sir,

With reference to the above subject, we are submitting herewith Six monthly compliance reports for your kind consideration.

We hope that all the document / information as submitted shall be in order.

Thanking you and with regards,

Yours faithfully  
For Ipca Laboratories Ltd.

  
10/11/2019  
(Rahul Pradhan)  
Unit Head

Encl As above  
CC : Member Secretary (SEIAA-Bhopal)

**Ipca Laboratories Ltd. Ratlam**

**EC Specific condition Compliance**

S. No	Conditions of Environment Clearance	Status	Status of Compliance for the period April -2019 to Sep-2019
6.	<ul style="list-style-type: none"> <li>• In plant control measures for checking fugitive emissions from all the vulnerable sources shall be provided.</li> <li>• Fugitive emissions shall be controlled by providing closed storage, closed handling &amp; conveyance of chemicals /materials, multi cyclone separator and water sprinkling system.</li> <li>• Dust suppression system including water sprinkling system shall be provided at loading and unloading areas to control dust emissions.</li> <li>• Fugitive emissions in the work zone environment, product, raw material storage area etc. Shall be regularly monitored.</li> <li>• The emissions shall conform to the limits stipulated by the MPPCB.</li> </ul>	Complied	<p>In order to control fugitive emissions materials / chemicals are handled in closed system.</p> <p>Suitable dust extractor and collection systems are provided in Powder Process areas.</p> <p>All our Raw materials are coming in closed containers and hence there is no dust emission at loading/Unloading areas of Warehouses, however at Boiler Area, dust is suppressed by manual sprinkling of water.</p> <p>All our batch charging takes place in closed systems . Monitoring for work place is carried out at regular interval of Six Months. It is carried out for parameters like Dust, VOC etc. at various locations (identified the location in nos. or area). Monitoring is done by third party (Precitech Laboratories). Latest Copy of Workplace monitoring is attached as Annexure-20</p> <p>All emissions are within stipulated limits of MPPCB.</p>
7.	<p>For further control of fugitive emissions, following steps shall be followed :-</p> <ol style="list-style-type: none"> <li>1. Closed handling system shall be provided for chemicals.</li> <li>2. Reflux condenser shall be provided over reactor.</li> <li>3. System of leak detection and repair of pump/pipeline based on preventive maintenance.</li> <li>4. The acids shall be taken from storage tanks to reactors through closed pipeline. Storage tanks shall be vented through trap receiver and condenser operated on chilled water.</li> <li>5. Cathodic protection shall be provided to the underground solvent storage tanks.</li> </ol>	Complied	<ol style="list-style-type: none"> <li>1. Yes we have closed handling system for chemicals i.e. storage tank pumps and pipelines with day storage tank.</li> <li>2. Yes it is available on each reactor .</li> <li>3. We have preventive maintenance schedule for all the equipments installed at site for addressing the issues of leakages &amp; repairs.</li> <li>4. Yes, the acids are transferred from storage tanks to reactors through closed pipeline. Storage tanks shall be vented through trap receiver and condenser operated on chilled water.</li> <li>5. It was done at the time of installation of tanks.</li> </ol>

S. No	Conditions of Environment Clearance	Status	Status of Compliance for the period April -2019 to Sep-2019							
8.	<p>The gaseous emissions from DG set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution.</p>	Complied	<p>Adequate stack height is provided for all the DG sets. Stack Emission is being monitored by third party.</p> <p>Similarly suitable acoustic enclosures are provided. Refer attached Annexure-21.</p>							
9.	<p>Solvent management shall be carried out as follows:</p> <table border="1" data-bbox="228 470 628 1472"> <tr> <td data-bbox="228 470 628 573">A) Reactor shall be connected to chilled brine condenser system.</td> </tr> <tr> <td data-bbox="228 573 628 711">B) Reactor and solvent handling pump shall have mechanical seals to prevent leakages.</td> </tr> <tr> <td data-bbox="228 711 628 884">C) The condensers shall be provided with sufficient HTA and residence time so as to achieve more than 95%recovery.</td> </tr> <tr> <td data-bbox="228 884 628 1022">D) Solvents shall be stored in a separate space specified with all safety measures.</td> </tr> <tr> <td data-bbox="228 1022 628 1161">E) Proper earthing shall be provided in all the electrical equipments wherever solvent handling is done.</td> </tr> <tr> <td data-bbox="228 1161 628 1333">F)Entire plant shall be flame proof. The solvent storage tanks shall be provided with breather valve to prevent losses.</td> </tr> <tr> <td data-bbox="228 1333 628 1472">g) All the solvent storage tanks shall be connected with vent condensers with chilled brine circulation.</td> </tr> </table>	A) Reactor shall be connected to chilled brine condenser system.	B) Reactor and solvent handling pump shall have mechanical seals to prevent leakages.	C) The condensers shall be provided with sufficient HTA and residence time so as to achieve more than 95%recovery.	D) Solvents shall be stored in a separate space specified with all safety measures.	E) Proper earthing shall be provided in all the electrical equipments wherever solvent handling is done.	F)Entire plant shall be flame proof. The solvent storage tanks shall be provided with breather valve to prevent losses.	g) All the solvent storage tanks shall be connected with vent condensers with chilled brine circulation.	Complied	<p>A. Reactors condensers are connected with necessary cooling arrangement like Brine, Chilling, Cooling water etc.</p> <p>B. Mechanical seal pumps are used for handling of solvent.</p> <p>C. For effective recovery efficient condensers has been installed after calculating required HTA .</p> <p>D. Solvent are stored separately as per PESO norms . PESO permission letter is attached as Annexure-22.</p> <p>E. Proper earthing has been provided to all equipments once in a year and regular inspections are done to maintain continuity. Earthing inspection report is attached as Annexure-23</p> <p>F. All electrical fitting are flame proof in all flammable areas /Zone. Solvent storage tanks has been provided with suitable safety systems like flame arrestors, fire hydrant system etc. Breather valves are also provided in solvent storage tank .</p> <p>G. Same as point A</p>
A) Reactor shall be connected to chilled brine condenser system.										
B) Reactor and solvent handling pump shall have mechanical seals to prevent leakages.										
C) The condensers shall be provided with sufficient HTA and residence time so as to achieve more than 95%recovery.										
D) Solvents shall be stored in a separate space specified with all safety measures.										
E) Proper earthing shall be provided in all the electrical equipments wherever solvent handling is done.										
F)Entire plant shall be flame proof. The solvent storage tanks shall be provided with breather valve to prevent losses.										
g) All the solvent storage tanks shall be connected with vent condensers with chilled brine circulation.										
10	<p>Fresh water requirement from ground water source shall not exceed 786 m3/day and prior permission shall be obtained from the CGWA/SGWA. 12	No effluent shall be discharged outside the plant premises and 'Zero' effluent discharge shall be maintained.	Complied	Already complying being a Zero Liquid Discharge Facility as per attached scheme ( Annexure -03).																							
13	Automatic/online monitoring system (24*7 monitoring devices) for flow measurement and relevant pollutants in the treatment system to be installed. The data to be made available to the respective SPCB and in the Company's website.	Complied	Automatic /online monitoring system (24*7 monitoring devices) for flow measurement and pH , COD , BOD , SS in the effluent treatment system is already installed and connected with CPCB / MPPCB servers.																							
14	Process effluent/any wastewater shall not be allowed to mix with storm water.  Storm water drain shall be passed through guard pond.	Complied	Storm water drain constructed and it is ensured that waste water is not mixing in it .  Storm Water drain is passed through a guard pond of adequate capacity																							
15	Hazardous chemicals shall be stored in tanks. Tank farms, drums, carboys etc.  Flame arresters shall be provided on tank farm. Solvent transfer shall be by pumps.	Complied	As per the condition Hazardous chemicals are stored in tanks. Tank farms, drums, carboys etc.  Flame arresters are provided on tank farm. Solvent are being transferred by pumps.																							

S. No	Conditions of Environment Clearance	Status	Status of Compliance for the period April -2019 to Sep-2019
16	High calorific value waste viz. Process organic residue and spent carbon shall be sent to cement industries. Inorganic & evaporation salt and ETP sludge and incinerator ash shall be disposed off to the TSDF. The fly ash from boiler shall be sold to brick manufactures /cement industry. Waste oil and used batteries will be sold to authorized recyclers/re-processors.	Complied	<p>Being complied as per the provisions of Hazardous Waste Management Rules and Authorization obtained from MPPCB.</p> <p>High calorific value waste viz. Process organic residue and spent carbon Already being sent for co-processing with Ultra Tech cement .</p> <p>Inorganic &amp; evaporation salt, ETP sludge and incinerator ash being disposed off to the TSDF of MP Waste Management Project, Pithampur.</p> <p>Waste oil and used batteries being disposed of authorized recyclers/re-processors.</p>
17	Till the remediation of the area is achieved, the unit shall provide water supply to the affected villages under CSR programme.	Complied	Company is providing drinking water to nearby villages.
18	The company shall obtain Authorization for collection, storage and disposal of hazardous waste under the Hazardous waste (Management, Handling and Trans-Boundary Movement) Rules, 2008 and amended as on date for management of hazardous wastes and prior permission from MPPCB shall be obtained for disposal of solid /hazardous waste in the TSDF. Measures shall be taken for firefighting facilities in case of emergency.	Complied	The company has obtained Authorization for collection, storage and disposal of hazardous waste under the Hazardous and other waste (Management and Trans-Boundary Movement) Rules, 2016 as on date for management of hazardous wastes and prior permission from MPPCB has also been obtained for disposal of solid /hazardous waste in the TSDF of MP Waste Management Project, Pithampur.
19	The company shall strictly comply with the rules and guideline under manufacturing, Storage and import of Hazardous chemical (MSIHC) Rules, 1989 as amended time to time .All transportation of Hazardous chemical shall be as per motor vehicle Act (MVA), 1989.	Complied	Being complied.
20	Fly ash shall be stored separately as per CPCB guideline so that it shall not adversely affect the air quality, becoming air borne by wind or water regime during rainy season by flowing along with the storm water. Direct exposure of workers to fly ash & dust shall be avoided.	Complied	The Fly Ash being stored separately as per CPCB Guidelines under the shed with continuous sprinkling of water to prevent airborne particles and also contained inside the dyke to prevent flow into the storm water.

S. No	Conditions of Environment Clearance	Status	Status of Compliance for the period April -2019 to Sep-2019
21	<p>The company shall undertake following waste minimization measures:</p> <p>A) Metering and control of quantities of active ingredients to minimize waste.</p> <p>B) Reuse of by-products from the process as raw materials or as raw material substitutes in other processes.</p> <p>C) Use of automated filling to minimize spillage.</p> <p>D) Use of close feed system into batch reactors.</p> <p>E) Venting equipment through vapor recovery system.</p> <p>Use of high pressure hoses for equipment cleaning to reduce wastewater generation.</p>	Complied	<p>A) Batch wise quantity is closely monitored.</p> <p>B) Continues efforts are done to optimize raw material consumption and to get maximum yield. Solvents are recovered and reused.</p> <p>C) Being complied</p> <p>D) Hazardous chemicals are handled in close system with suitable operation control procedures.</p> <p>E) Equipment are vented through vapour column followed by primary and secondary condensers for vapour condensation and recovery.</p> <p>F) Equipment are cleaned by high pressure hoses.</p>
22	The unit shall make the arrangement for protection of possible fire hazards during manufacturing process in material handling. Fire fighting system shall be as per the norms	Complied	It is already available, as per norms and maintained by fire staff.
23	Occupational health surveillance of the worker shall be done on regular basis and records maintained as per the Factories Act.	Complied	It is already practiced. As per SOP and records are being maintained at occupational health center.
24	As proposed, green belt shall be developed in 14.76 ha. Out of total plant area of 40.47 ha. Selection of plant species shall be as per the CPCB guidelines.	Complied	Being complied . There are continual efforts for increasing the Green Belt as per attached Photographs as per Annexure no.27 . Total Green Belt inside the premises is 41.05% of total land area available.
